

Lathem LTT | Time and Date Stamp

Price: \$425.00

Manufacturer: Lathem

Description

The LT Series provides an excellent way to stamp important documents with dates, times, numbers, and other customer-specific information. Designed to stand up to years of intense usage it is virtually maintenance-free. Yet this surprisingly smooth stamp registers all the information you need with remarkable precision.

The LT now comes with standard automatic activation. Push button activation is still optional when ordering.

Designed to stand up to years of heavy day-in, day-out usage, a Lathem LT is virtually maintenance-free. Yet this smooth stamp registers all the information you need with remarkable precision.

Unique Dual Registration

This exclusive feature lets you stamp papers automatically or by push button.

The automatic trigger works with both standard and multi-carbon forms. A push button on the front of the machine lets you operate the stamp manually if positioning the registration is particularly important.

Easy-To-Read Digital Clock

The large fluorescent display (available on any LT model that prints time) comes in standard (1-12) hour displays with AM/PM and minute, or continental (0-23) hours with minutes.

Smoother Operation

Thanks to a separate, motor-driven ribbon shift the LT Series has little of the vibration you normally expect from a time stamp. The ribbon shifts smoothly after each registration, automatically reversing at the end of each spool.

Clearer Registrations

The silk ribbon, supplied as standard, provides a longer-lasting, darker imprint and no smudges.

Adjustable Registration Position

Move the registration trigger and you avoid overprinting words that are already on your documents. You can move the imprint area up or down, and from side to side.

Repeat and Advance Numbering

An optional switch on the back of the machine lets you override the automatic numbering advance. You can repeat a given number as many times as you want before switching back to the automatic sequential numbering.

Other features include variable stamping impact, long life print wheels and an impact-resistant case with tamper-proof lock.

Models Available

- ✓ Lathem Model LTN prints numbers consecutively.
- ✓ Lathem Model LTD prints date.
- ✓ Lathem Model LTTN prints time, date and numbers.
- ✓ Lathem Model LTT prints time and date.
- ✓ Lathem Model LTDN prints date and numbers.

Customized Die Plates

Die plates are an option that let you print additional information above or below the registration line. They can be supplied as either fixed or removable plates. Removable plates can be interchanged as your requirements change. Removable signature plates can be stored for safekeeping.
