Description

S-Series Holders are softer, more flexible material carries thicker cards without splitting. And the holders have no clip attached; they are slotted through the front and back. Using a strap clip keeps metal further away and locks the card into the holder.

Users of proximity cards have reported two major problems with their badge holders:

- 1) The cards are often thicker than normal ID cards, causing conventional badge holders to split apart after a short time.
- 2) Proximity cards don't work properly when they are very close to metal objects, such as metal badge clips.

S-Series Holders solve both problems. softer, more flexible material carries thicker cards without splitting. And the holders have no clip attached; they are slotted through the front and back. Using a strap clip keeps metal further away and locks the card into the holder.

Outside Dimensions

(Width x Height): 2-5/8" x 4-3/8"

Maximum Insert Size

(Width x Height): 2-1/8" x 3-3/8"
