About AMG Time Management Attendance System

[AMG Attendance System](#) is a user-friendly, flexible and full featured employee management tool which allows controlling your employees' attendance by automating timekeeping and attendance tracking. It captures data from electronic data terminals such as Badge Readers, Fingerprint Readers, Biometric Hand Readers which includes the Refurbished HandPunch HP1000 and simultaneously allows optional PC entry. Based on those IN and OUT punches polled from the devices, it automatically calculates employees' working time and wages.

AMG Employee Management Attendance System Can Help You By:

- ✓ Reducing time needed to verify attendance data
- ✓ Reducing payroll processing time and cost
- ✓ Eliminating mistakes in calculating work hours and wages
- ✓ Eliminating unauthorized overtime
- ✓ Automatically generating reports and payroll exports

What Are The Benefits For Your Business?

- ✓ Better control of labor force
- ✓ Improved work productivity
- ✓ Better control over cost distribution
- ✓ Efficient use of human and financial resources

Refurbished HandPunch HP1000 - Schlage Biometric Hand Reader

When You Want To Cut Time and Attendance Costs...Do It By Hand

Schlage Biometrics brings the accuracy and convenience of biometric technology easily within reach of any time and attendance application with the Refurbished HandPunch HP1000. In operations that range from coal mines to clean rooms, the Schlage Refurbished HandPunch HP1000 hand reader has proven itself to be a practical and precise solution for employee time management and access control.

Our Biometric Time Clock, Hand Scanner, Works by Identifying Employees' Hand Geometry Instantly

Schlage Refurbished HandPunch HP1000 identifies the employee by the unique size and shape of their hand. This means your employees will no longer need to carry cards or keys. The costs and risks associated with credentials that can be lost, stolen or duplicated without authorization is also eliminated. Schlage Refurbished HandPunch HP1000 Recognition Systems also eliminates time fraud by making it virtually impossible to "buddy punch." The result is more accuracy, productivity and profitability for your company.

Your Hand Is Your Card

With our Refurbished HandPunch HP1000 biometric hand reader there are no cards to create, administer, carry or lose. For mid-size companies, the Refurbished HandPunch HP1000 provides a high return on investment by eliminating the cost associated with administering and managing cards. For companies that have single or multiple locations and face the daily occurrence of buddy punching, the Schlage Refurbished HandPunch HP1000 will eliminate employee time theft instantly.

Affordable Ethernet Solution

Refurbished HandPunch HP1000 hand reader comes standard with serial RS232 connection allowing for quick integration into your time management systems, applications and existing network infrastructure.

Hand Geometry Technology

The Refurbished HandPunch HP1000 uses Schlage's field-proven hand geometry biometric technology. The Refurbished HandPunch HP1000 captures an image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No finger or palm prints are taken. The technology works well indoor as well as in harsh environments.

Antimicrobial Protection

Every Refurbished HandPunch HP1000 biometric hand reader contains a silver-based anti-microbial agent-which is embedded into the materials used to produce the platen, providing a finish that inhibits the growth of a broad spectrum of bacteria, mold, and fungi and remains active for the life of the Refurbished HandPunch HP1000.

Hand Outline

The Refurbished HandPunch HP1000 comes standard with a blue hand outline printed on the platen. This hand outline helps new users place their hand accurately on the platen thus decreasing initial enrollment time and better enrollment quality. It also includes the Ingersoll Rand Schlage Biometrics logo.
