Manufacturer: Schlage Biometric

Features

Features of the Schlage Break Compliant HandPunch 1000 XL

- ✔ Saves money over card-based systems
- ✔ Dramatically reduces payroll costs
- ✔ Easily integrates into existing time management system
- ✔ Eliminates badges
- ✔ Eliminates buddy punching
- ✔ Hand Geometry Technology
- ✔ RS232 Connection- Provided 50' RS232 Cable
- ✔ Standard with 50 employees and expands to 100 and 512
- ✔ Platen also comes standard with a printed hand outline to ensure accurate hand placement while punching

Specifications of the HandPunch 1000 XL

- ✔ Verification time – Less than 1 second
- ✔ User capacity – 50 users expandable to 100 and 512 users
- ✔ Transaction storage – 5120 transactions
- ✔ Memory retention – Up to 5 years via the standard internal lithium battery
- ✔ ID number length – 1 to 10 digits from keypad
- ✔ Template size – 9 bytes
- ✔ Communications – RS-232, 50' foot cable (included)
- ✔ Power supply – 12 to 24 VDC OR 12 to 24VAC 50/60 Hz
- ✔ Power consumption – 7 watts
- ✔ Ambient Temperature – 14°F – 113°F (-10°C - 60°C)
- ✔ Humidity Temperature – 5% - 85% (no condensation)
- ✔ Dimensions 11.65"H x 8.85 W x 8.55"D (176 H mm x 158 W mm x 153 D mm)
- ✔ Weight –6 lbs. (2.7kg)

Description

Schlage Break Compliant HandPunch 1000 XL

Break Compliant HandPunch Line

Schlage is pleased to announce our new line of readers that is now capable of complying with labor

"break" laws that have been adopted by more than 20 states. These labor laws are in place to regulate on-the-job meals and breaks for employees. When integrated with the [AMG Employee Attendance Software](#), the Schlage HandPunch 1000 XL "Break Compliance" capability will make it possible for employers to comply with laws relating to meals and breaks, avoiding potential fines and lawsuits. To ensure each employee takes a full 30 minutes of lunch or 10 minutes of break periods the Break compliant HandPunch 1000 XL will reject the employee from clocking back to work before the full duration has expired.

When You Want To Cut Time and Attendance Costs...Do It By Hand

Schlage Biometric Handpunch 1000 XL brings the accuracy and convenience of biometric technology easily within reach of any time and attendance application with the HandPunch 1000 XL. In operations that range from coal mines to clean rooms, the Schlage HandPunch 1000 XL has proven itself to be a practical and precise solution for employee time management and access control.

Our Biometric Timeclock, Hand Scanner, Works By Identifying Employees' Hand Geometry Instantly

Schlage HandPunch 1000 XL identifies the employee by the unique size and shape of their hand. This means your employees will no longer need to carry cards or keys. The costs and risks associated with credentials that can be lost, stolen or duplicated without authorization is also eliminated. Schlage HandPunch 1000 XL also eliminates time fraud by making it virtually impossible to "buddy punch." The result is more accuracy, productivity and profitability for your company.

Your Hand Is Your Card

With the HandPunch 1000 XL; there are no cards to create, administer, carry – or lose. For mid-size companies, the HandPunch 1000 XL provides a high return on investment by eliminating the cost associated with administering and managing cards. For companies that have small, multiple locations, minimal supervision leaves an opportunity for buddy punching and time fraud. With the Schlage HandPunch1000 XL one employee can't punch for the other. Time fraud is eliminated thereby reducing payroll costs and positively impacting your company's profitability.

Affordable Ethernet Solution

The HandPunch 1000 XL hand recognition time clock comes standard with serial RS232 connection allowing for quick integration into your time management systems, applications and existing network infrastructure.

Hand Geometry Technology

The Break Compliant HandPunch 1000 XL uses Schlage's field-proven hand geometry biometric technology. The HandPunch 1000 XL captures an image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No fingerprints or palm prints are utilized. The technology works well indoor as well as in harsh environments.

Antimicrobial Protection

The HandPunch 1000 XL biometric hand reader contains a silver-based anti-microbial agent-which is embedded into the materials used to produce the platen, providing a finish that inhibits the growth of a broad spectrum of bacteria, mold, and fungi and remains active for the life of the HandPunch 1000 XL.

Hand Outline

The HandPunch 1000 XL comes standard with a blue hand outline printed on the platen. This hand outline helps new users place their hand accurately on the platen thus decreasing initial enrollment time and better enrollment quality. It also includes the Ingersoll Rand Schlage Biometrics logo.

When paired with the AMG Employee Attendance software, the HandPunch 1000 XL biometric attendance system delivers tangible benefits and reduces payroll and administration costs. To view our
