

HandPunch 3000E Ethernet Based TimeClock

Price: \$2387.00
Free shipping on US orders

Manufacturer: Schlage Biometric

Features

Features of the HandPunch 3000E:

- ✓ Saves money over card-based systems
- ✓ Dramatically reduces payroll costs
- ✓ Easily integrates into existing time management systems
- ✓ Eliminates badges
- ✓ Eliminates buddy punching
- ✓ Fast and easy to use hand geometry technology
- ✓ Comes standard with an Ethernet card
- ✓ Standard with 512 active employees, expandable to 9,728 and 32,512
- ✓ Platen also comes standard with a printed hand outline to ensure accurate hand placement while punching

Product Specifications of the HandPunch 3000E:

- ✓ Verification time - Less than 1 second
- ✓ User capacity - 512 users expandable to 9,728 and 32,512
- ✓ Transaction storage - 5120 transactions
- ✓ Memory retention - Up to 5 years via the standard internal lithium battery
- ✓ ID number length - 1 to 10 digits from keypad
- ✓ Template size - 9 bytes
- ✓ Communications - RS-232, 50' foot cable (included)
- ✓ Power supply - 12 to 24 VDC OR 12 to 24VAC 50/60 Hz
- ✓ Power consumption - 7 watts
- ✓ Ambient Temperature - 14°F - 113°F (-10°C - 60°C)
- ✓ Humidity Temperature - 5% - 85% (no condensation)
- ✓ Dimensions 11.65"H x 8.85 W x 8.55"D (176 H mm x 158 W mm x 153 D mm)
- ✓ Weight -6 lbs. (2.7kg)
- ✓ Verification time - Less than 1 second

Description

HandPunch 3000E

When you want to cut time and attendance costs...do it by hand

Schlage Biometrics brings the accuracy and convenience of biometric technology easily within reach of any time and attendance application with the HandPunch 3000E. In operations that range from coal

mines to clean rooms, the Schlage HandPunch 3000E has proven itself to be a practical and precise solution for employee time management and access control.

Our Biometric Time Clock, Hand Scanner, Works by Identifying Employees' Hand Geometry Instantly

Schlage HandPunch 3000E identifies the employee by the unique size and shape of their hand. This means your employees will no longer need to carry cards or keys. The costs and risks associated with credentials that can be lost, stolen or duplicated without authorization is also eliminated. Schlage HandPunch 3000E Recognition Systems also eliminates time fraud by making it virtually impossible to “buddy punch.” The result is more accuracy, productivity and profitability for your company.

Your Hand Is Your Card

With the HandPunch 3000E there are no cards to create, administer, carry – or lose. For mid-size companies, the HandPunch 3000E provides a high return on investment by eliminating the cost associated with administering and managing cards. For companies that have small, multiple locations, minimal supervision leaves an opportunity for buddy punching and time fraud. With the Schlage HandPunch 3000E one employee can't punch for the other. Time fraud is eliminated thereby reducing payroll costs and positively impacting your company's profitability.

Affordable Ethernet Solution

Recognition Systems HandPunch 3000E comes standard with a built-in Ethernet (TCP/IP) connection allowing for quick integration into your time management systems, applications and existing network infrastructure.

Hand Geometry Technology

The HandPunch 3000E uses Schlage's field-proven hand geometry biometric technology. The terminal captures an image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No finger or palm prints are utilized. The technology works well indoor as well as in harsh environments.

Programmable Data Management Keys

The HandPunch 3000E has two user-definable data management keys that let you collect data as employees punch. Common uses include department transfers, tips collected, job codes, or pay codes.

Edit-at-the-Clock Functions

The HandPunch 3000E allows supervisors to override user restrictions and to input such items as missed punches, planned vacations, and sick time at the biometric time clock terminal. The password-protected mode provides greater supervisor flexibility by lessening the need for computer edits. Audit trails documenting the use of these functions are generated to ensure security.

Antimicrobial Protection

Every HandPunch 3000E biometric hand reader contains a silver-based anti-microbial agent-which is embedded into the materials used to produce the platen, providing a finish that inhibits the growth of a broad spectrum of bacteria, mold, and fungi and remains active for the life of the HandPunch 3000E.

Hand Outline

The HandPunch 3000E comes standard with a blue hand outline printed on the platen. This hand outline helps new users place their hand accurately on the platen thus decreasing initial enrollment time and better enrollment quality. It also includes the Ingersoll Rand Schlage Biometrics logo.

When paired with the AMG Employee Attendance software, the HandPunch 3000E biometric attendance systems delivers tangible benefits and reduces payroll and administration costs. To view our promotional package, please [click here](#).
