

HandPunch 3000 XL| Break Compliant Time Clock

Price: \$2156.00
Free shipping on US orders

Manufacturer: Schlage Biometric

Features

Ingersoll Rand HandPunch 3000 XL Break Compliant Biometric System Main Features

- ✓ 512-user capacity.
- ✓ Two programmable function keys.
- ✓ Break Compliant HandPunch
- ✓ Eliminates Badges.
- ✓ Eliminates Buddy Punching.
- ✓ Fast and easy to use.
- ✓ Provides the most accurate time and attendance solution available.
- ✓ Break Compliant HandPunch

Features of the HandPunch 3000 XL

- ✓ Data Input: Keypad with 2 Programmable Function Keys
- ✓ Communication: Serial RS232 Communication
- ✓ Memory: 512 users
- ✓ Display: 2 x 16 Backlit LCD
- ✓ Dimensions: W8.85" x H11.65" x D8.55"
- ✓ Case: High-Strength, Injection-Molded Plastic
- ✓ 12 to 24 VDC or 12 to 24 VAC 50-60Hz, 7 watts
- ✓ Transaction Storage: 5120 Transaction
- ✓ Template Size: 9 bytes

Description

Schlage Break Compliant HandPunch 3000 XL

Break Compliant HandPunch Line

Schlage is pleased to announce a new line of readers the HandPunch 3000 XL is now capable of complying with labor "break" laws that have been adopted by more than 20 states. These labor laws are in place to regulate on-the-job meals and breaks for employees. When integrated with the [AMG Employee Attendance Software](#), the Schlage HandPunch 3000 XL "Break Compliance" capability will make it possible for employers to comply with laws relating to meals and breaks, avoiding potential fines and lawsuits. To ensure each employee takes a full 30 minutes of lunch or 10 minutes of break periods the break compliant HandPunch 3000 XL will reject the employee from clocking back to work before the full duration has expired.

When you want to cut time and attendance costs...do it by hand

Schlage Biometrics brings the accuracy and convenience of biometric technology easily within reach of any time and attendance application with the HandPunch 3000 XL. In operations that range from coal mines to clean rooms, the Schlage HandPunch 3000 XL has proven itself to be a practical and precise solution for employee time management and access control.

Our biometric time clock, hand scanner, works by identifying employees' hand geometry instantly

Schlage HandPunch 3000 XL series identifies the employee by the unique size and shape of their hand. This means your employees will no longer need to carry cards or keys. The costs and risks associated with credentials that can be lost, stolen or duplicated without authorization is also eliminated. Schlage HandPunch 3000 XL Recognition System also eliminates time fraud by making it virtually impossible to “buddy punch.” The result is more accuracy, productivity and profitability for your company.

Your Hand Is Your Card

With the HandPunch 3000 XL biometric time clock there are no cards to create, administer, carry or lose. For mid-size companies, the biometric system provides a high return on your investment by eliminating the cost associated with administering and managing cards. For companies that have small, multiple locations, minimal supervision leaves an opportunity for buddy punching and time fraud. With the Schlage HandPunch 3000 XL one employee can't punch for the other. Time fraud is eliminated thereby reducing payroll costs and positively impacting your company's profitability.

Affordable Ethernet Solution

The HandPunch 3000 XL Recognition System from Schlage comes standard with serial RS232 connection allowing for quick integration into your time management systems, applications and existing network infrastructure. Additionally you can upgrade to Ethernet (TCP/IP) as well.

Hand Geometry Technology

The HandPunch 3000 XL uses Schlage's field-proven hand geometry biometric technology. The terminal captures an image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No finger or palm prints are utilized. The technology works well indoor as well as in harsh environments.

Programmable Data Management Keys

This Break Compliant biometric handpunch 3000xl system has two user-definable data management keys that let you collect data as employees punch. Common uses include department transfers, tips collected, job codes, or pay codes.

Antimicrobial Protection

Every biometric hand reader contains a silver-based anti-microbial agent-which is embedded into the materials used to produce the platen, providing a finish that inhibits the growth of a broad spectrum of bacteria, mold, and fungi and remains active for the life of the HandPunch 3000 XL.

Hand Outline

The HandPunch 3000 XL comes standard with a blue hand outline printed on the platen. This hand outline helps new users place their hand accurately on the platen thus decreasing initial enrollment time and better enrollment quality. It also includes the Ingersoll Rand Schlage Biometrics logo.

When paired with the AMG Employee Attendance software, this biometric attendance system delivers tangible benefits and reduces payroll and administration costs. To view our promotional package, [please click here](#).
